Search Growth Proposal

SEO · AEO · GEO · Local Search · UI/UX · Google Ads

Lumos Dental & Aesthetic Clinic

lumosclinics.com · Aspin Commercial Tower, Sheikh Zayed Road, Dubai

PREPARED BY

Salman Usman

DATE

21 October 2026

AUDIT BASIS

127 URLs crawled · Lighthouse lab test

Confidential — prepared exclusively for Lumos Polyclinic L.L.C.

CONTENTS

What this proposal covers

1	Overview & Objective
2	Executive Summary — Audit Scorecard
3	Our Services
4	Audit Findings (Technical, On-Page, Content, Local, AI)
5	Plan of Action — SEO Optimisation & Ranking Techniques
6	Keyword Clustering & Page Mapping
7	Answer Engine Optimisation (AEO)
8	Generative Engine Optimisation (GEO / AI Search)
9	Schema & Structured Data Plan
10	Sitemap & Site Architecture
11	Website Design & UI/UX Changes
12	Plan of Action — Google Business Profile
13	Plan of Action — Google Ads & GMB Ads (optional)
14	Healthcare Compliance & E-E-A-T
15	Measurement, KPIs & Reporting
16	Six-Month Roadmap
17	Why This Approach Works · Pricing · Terms

How to read this document. Sections 2 and 4 describe what we measured on lumosclinics.com on 21 October 2026. Sections 5 to 16 set out what we will do about it, in priority order. Every audit figure is measured directly from the live website, not estimated.

SECTION 1

Overview

In the competitive Dubai dental and aesthetic market, your online presence is your digital storefront. Patients now discover clinics in three places: the traditional Google results page, the Google Map Pack, and — increasingly — AI answers in Google AI Overviews, ChatGPT, Gemini and Perplexity. AiS LABZ provides a comprehensive strategy designed to win visibility across all three, and to convert that visibility into high-value patient traffic.

Our goal is to move beyond simple clicks and focus on generating **confirmed consultations** for high-value treatments such as veneers and Hollywood smiles, dental implants, orthodontics, injectables, skin boosters and laser treatments.

Objective

To transform the Lumos Clinics digital footprint into a conversion engine. We will lead the UI/UX improvements, execute an aggressive SEO, AEO and GEO strategy, and dominate local search through Google Business Profile and Ad management — so that Lumos is the first choice for patients searching on and around Sheikh Zayed Road, DIFC, Downtown, Business Bay and Trade Centre.

What success looks like at six months

- Every treatment page indexed, eligible for featured snippets and AI Overviews, and mapped to one clear keyword cluster.
- Mobile page speed brought from failing to passing Core Web Vitals thresholds.
- Lumos cited by name when patients ask AI assistants for dental or aesthetic clinics on Sheikh Zayed Road.
- A growing, steady flow of Google reviews and a fully built-out Google Business Profile.
- Every call, WhatsApp click and online booking tracked to the channel and campaign that produced it.

SECTION 2

Executive summary — audit scorecard

Lumos has an unusually strong base for a clinic website: 127 live pages, around 90 dedicated treatment pages, an SEO plugin already generating sitemaps and breadcrumbs, and Google Tag Manager installed. The problem is not volume of content — it is that a set of technical settings and structural issues are **preventing that content from ranking, appearing in AI answers and converting on mobile**.

28/100 Lighthouse mobile performance (desktop 51)	**10.9s** Mobile Largest Contentful Paint (target under 2.5s)	**12.7 MB** Homepage weight on mobile; 5.9 MB is two videos	**2.0s** Server response time (target under 0.8s)
36 Pages blocked from snippets & AI answers (nosnippet)	**18** Treatments published twice at two URLs	**57** Pages with zero or multiple H1 headings (of 127)	**29** Pages missing a meta description
80 Page titles longer than 60 characters	**1,891** Images without alt text	**0** Blog articles published (blog page exists)	**0** MedicalClinic / Dentist / Physician schema

The five issues that matter most

#	Issue	Why it matters to Lumos
1	**36 pages carry a 'nosnippet' directive**, including the core 'Dentist in Dubai', 'Cosmetic Dentistry', 'Aesthetic Treatments' and 'Anti-Aging' hub pages.	Google cannot show a description, a featured snippet or use these pages in AI Overviews. These are the clinic's most commercially important pages.
2	**Mobile performance is 28/100**; the homepage downloads 12.7 MB and takes 10.9s to show its main content.	Most Dubai treatment searches happen on mobile. Slow pages lose rankings and lose patients before the booking button appears.
3	**18 treatments exist at two URLs** (e.g. /orthodontics/ and /treatments/orthodontics/) with identical titles.	The two versions compete against each other, splitting authority so neither ranks as well as one consolidated page.
4	**OpenAI's GPTBot crawler is rate-limited (HTTP 429)** at the hosting CDN, while other AI crawlers are served normally.	ChatGPT's training and knowledge crawler cannot reliably read the site, weakening Lumos's presence in ChatGPT answers.
5	**No medical-entity schema, no doctor credentials, no blog**.	Google and AI engines treat healthcare as 'Your Money or Your Life' content and reward demonstrable expertise. Today the site does not prove who the clinicians are.

SECTION 3

Our services

Long-Term SEO, AEO & GEO Marketing Plan — results in 4 to 6 months

Service line	What it includes
Organic SEO	Technical fixes, on-page optimisation, content consolidation and ongoing ranking improvement.
Keyword optimisation	Cluster-based keyword mapping so every treatment has one page, one intent and one primary keyword.
On-page optimisation	Titles, meta descriptions, heading hierarchy, internal links, image alt text and calls to action.
Answer Engine Optimisation (AEO)	Question-led content and FAQ structures that win featured snippets, People Also Ask and voice results.
Generative Engine Optimisation (GEO)	Making Lumos citable by Google AI Overviews, ChatGPT, Gemini and Perplexity.
Schema & structured data	MedicalClinic, Dentist, Physician, MedicalProcedure and FAQ markup across the site.
Backlink development	Healthcare directories, Dubai lifestyle press, partnerships and digital PR.
Improved local rankings	Map Pack visibility for Sheikh Zayed Road and the surrounding districts.
Google listing enhancement	Full Google Business Profile build-out, review programme and weekly posting.

Website Development & UI/UX Solution

Focus: Strategic Audit and Implementation Oversight. Because your platform is already established (WordPress, Elementor, Rank Math, LatePoint booking), our role is to act as the **Strategic Bridge** between your brand goals and your development team. We provide the 'Blueprint for Conversion' that your developer will execute, so that no lead is lost.

- **Conversion Rate Optimisation (CRO) Audit** — every step from landing page to confirmed booking.
- **User Journey Mapping** — separate journeys for dental, aesthetic, dermatology and wellness patients.
- **Aesthetic Content Strategy** — compliant before-and-after galleries, doctor profiles and treatment explainers.
- **Technical Implementation Guidance**:
  - **Mobile Call-to-Action bar**: 'Call', 'WhatsApp' and 'Book' stay visible while patients scroll.
  - **Page speed benchmarks**: specific load-time targets for your developer to meet (Section 11).
- **Form & booking optimisation** — fewer fields and fewer steps to increase digital enquiries.

SECTION 4

Audit findings

Status: **completed for SEO**, **completed for AI search readiness**, **completed for website performance**, and **completed for Google Profile and Google Ads readiness**. All 127 URLs listed in the site's XML sitemaps were fetched and parsed on 21 October 2026. Performance figures are from a Lighthouse lab test of the homepage (mobile and desktop).

4.1 Technical SEO & performance

Severity	Finding	Evidence & recommended fix
Critical	Mobile performance 28/100; LCP 10.9s; Total Blocking Time 8.8s; Speed Index 12.9s.	Desktop scores 51 (LCP 1.9s). Fix: replace autoplay hero videos with a compressed poster image, defer scripts, reduce Elementor add-ons, enable page caching.
Critical	Homepage weighs 12.7 MB: two MP4 videos (5.9 MB), 114 images (4.2 MB), 11 font files (1.4 MB).	Offscreen images could save 3.8 MB and responsive sizing a further 2.9 MB. Two icon-font plugins load 0.8 MB on their own.
High	Server response time 2.0s; CDN reports pages as uncached ('DYNAMIC').	Enable full-page caching on Hostinger (LiteSpeed Cache or equivalent) and object caching. Target under 0.8s.
High	Page structure is very heavy: 4,806 DOM elements, 42 scripts and 47 stylesheets on the homepage.	Simplify Elementor sections, remove unused widgets and plugins; target under 1,500 elements.
Medium	Accessibility 83/100 mobile; Best Practices 79/100.	Contrast, link names and image alt text fixes (below) also lift these scores.
Good	HTTPS enforced; HTTP and www redirect correctly; every page returns 200 with a self-referencing canonical.	No action — a sound foundation.

4.2 Indexing, duplication & crawl directives

Severity	Finding	Evidence & recommended fix
Critical	36 pages use the robots directive 'nosnippet, noarchive'.	Includes /dentist-in-dubai/, /cosmetic-dentistry-in-dubai/, /aesthetic-treatments-in-dubai/, /anti-aging-treatments-in-dubai/, /dermatology-skin-care-in-dubai/. Fix: remove 'nosnippet' in Rank Math so these pages can earn snippets and AI Overview citations.
Critical	18 treatments are published at both a root URL and a /treatments/ URL with identical titles.	e.g. /orthodontics/ and /treatments/orthodontics/; /fotona-laser/ and /treatments/fotona-laser/. Fix: keep the stronger URL, 301-redirect the other, update internal links.
High	Further overlapping pages split the same topic.	/root-canals/ vs /treatments/root-canal-in-dubai/; two 'dental-treatments-dubai' pages (one ends '-2'); two skin-booster pages; two Exosomes pages; 'hyperpigmentation' and 'pigmentation-hyperpigmentation'.
High	Malformed URLs contain the domain name inside the slug.	/treatments/https-lumosclinics-com-tooth-extraction-in-dubai/, ...-tmj-surgery-in-dubai/, ...-skin-boosters-hydration-quality-in-dubai/. Fix: clean slugs with 301 redirects.
High	Utility and account pages are in the XML sitemap.	/my-account/, /customer-dashboard/, /latepoint/, /latepoint-booking/, /survey-page/, /sitemap/. Fix: noindex and remove.
High	The About page (/about/) — which holds the doctor team — is missing from the sitemap. /contact/ and /contact-us/ return 404.	Add /about/ to the sitemap and create a dedicated Contact page with map, hours and NAP.

Severity	Finding	Evidence & recommended fix
Medium	Spelling error in a treatment URL and title: 'viginismus'.	Correct to 'vaginismus' (the term patients search for) with a 301 redirect.

4.3 On-page SEO

Severity	Finding	Evidence & recommended fix
High	34 pages have no H1; 23 pages have between 3 and 19 H1 headings each.	Treatment templates tag 'Benefits', 'Step 1', 'Consultation' and related-treatment cards as H1. Fix: one H1 per page, H2/H3 for sections — a template-level fix that corrects ~90 pages at once.
High	29 pages have no meta description; 16 title tags are duplicated.	Write unique, benefit-led descriptions (150–160 characters) with a clear call to action.
Medium	80 of 127 titles (63%) exceed 60 characters and are truncated in Google.	The suffix 'Lumos Dental & Aesthetic Clinic In Dubai' uses 40 characters. Use '| Lumos Clinic Dubai' instead.
Medium	The phone number is marked up as an H2 heading many times per page.	Convert to styled text or a button; headings should describe content.
Medium	1,891 images (13%) lack alt text.	Descriptive alt text on treatment, doctor and clinic images; decorative images marked as such.

4.4 Content, local & AI readiness

Severity	Finding	Evidence & recommended fix
High	The blog exists but has no published articles.	No informational content to capture 'how much', 'does it hurt', 'how long' searches — the questions AI engines answer.
High	Doctors are named without qualifications, DHA licence numbers or individual profile pages.	Build doctor profile pages with credentials and link each treatment to its treating clinician.
High	Structured data is generic (Organization, WebPage, Service). No MedicalClinic, Dentist, Physician, address, geo-coordinates or opening hours.	Deploy the schema plan in Section 9.
High	GPTBot (OpenAI) receives HTTP 429 'Too Many Requests'; ClaudeBot, PerplexityBot and OAI-SearchBot are served normally.	Allow-list verified AI crawlers in the Hostinger CDN / security settings.
Medium	Brand name is inconsistent: 'Lumos Polyclinic llc.', 'Lumos Clinic', 'Lumos Dental & Aesthetic Clinic'.	Standardise one public name across website, schema, Google, Apple, Bing and directories. A Turkish clinic named 'Lumos Dental' also exists — consistent naming prevents AI engines confusing the two.
Medium	llms.txt exists but lists legal pages first, contains HTML entities and a spelling error ('Dermathology').	Rewrite as a clean guide to services, doctors, location, hours and booking.
Medium	Schema 'sameAs' lists only Facebook; Instagram (@lumosclinic.ae) and directories are missing. No Arabic version or hreflang.	Expand sameAs; plan an Arabic language layer for the top 20 treatments (Phase 2).

SECTION 5

Plan of action — SEO optimisation & ranking techniques

Keyword Research and Optimisation

A thorough analysis will identify high-impact, achievable keywords for Lumos Dental & Aesthetic Clinic in Dubai across English and Arabic. Keywords are organised into the twelve clusters in Section 6, and every cluster is assigned one primary page so that pages never compete with each other. Search volumes, difficulty and baseline rankings are captured in Month 1 from Google Search Console and Google Keyword Planner, and form the benchmark for monthly reporting.

On-Page Optimisation

- Rewrite title tags to a consistent pattern: *[Treatment] in Dubai* | *[Benefit or 'From AED']* | *Lumos Clinic*, under 60 characters.
- Unique meta descriptions for all 127 pages, written to raise click-through rate.
- Fix the treatment template so each page has exactly one H1 and a logical H2/H3 outline.
- Clean, keyword-led URLs; consolidate the 18 duplicate pairs and overlapping pages with 301 redirects.
- Descriptive alt text for all treatment, clinician and clinic images.
- A visible 'Medically reviewed by Dr. ___, DHA licence ___ · Last updated ___' line on every treatment page.

Content Strategy

- Four expert articles per month answering real patient questions (cost, recovery, comparisons, suitability) — each linked to the relevant treatment page.
- An FAQ block of 5–8 questions on every treatment page, written for voice search and AI answers.
- Transparent 'from' pricing or price-range guides for veneers, implants, Botox, fillers, Profhilo and laser hair removal — the single most-searched question category in this market.
- Comparison pages: veneers vs. composite bonding, Profhilo vs. polynucleotides, Botox vs. fillers, Invisalign vs. braces.

Technical SEO

- Remove 'nosnippet' and 'noarchive' from all indexable pages; noindex account, booking and survey pages.
- Implement the full schema plan (Section 9) and validate with Google's Rich Results Test.
- Fix broken links and redirect chains created during consolidation; regenerate and resubmit the XML sitemap.
- Bring mobile Core Web Vitals into the 'good' range (Section 11 benchmarks).
- Allow-list verified AI crawlers; register the site in Bing Webmaster Tools (Bing data feeds ChatGPT search and Copilot).

Ranking Improvement Techniques

Technique	How we apply it at Lumos
Hub-and-spoke internal linking	Category hubs (Dentistry, Injectables, Skin, Laser, Hair, Wellness) link to every treatment; treatments link back to the hub, to related treatments and to the treating doctor.
Content consolidation	Merge duplicate and overlapping pages so ranking signals concentrate on one strong URL per topic.
Click-through optimisation	Titles and descriptions tested against Search Console data; pages ranking 5–15 are prioritised.

Technique	How we apply it at Lumos
Topical authority	Cluster articles that answer every question around a high-value treatment before moving to the next.
E-E-A-T signals	Doctor profiles, credentials, medical review dates, DHA licence, real clinic photography.
Local relevance	Area pages only where Lumos genuinely serves patients (DIFC, Downtown, Business Bay, Trade Centre) — each with unique travel, parking and landmark content, never thin duplicates.
Freshness	Quarterly review of every treatment page; 'last updated' dates kept honest.

Link Building

- Healthcare directories and booking platforms: Doctify, Okadoc, Vezeeta, Yellow Pages UAE, HiDubai, Connect.ae.
- Dubai lifestyle and wellness media (e.g. features, expert quotes and 'best of' round-ups).
- Partnerships with Sheikh Zayed Road and DIFC corporate wellness programmes, gyms and hotels.
- Expert commentary from Lumos doctors for health and beauty journalists (digital PR).
- Reclaiming unlinked brand mentions and fixing broken inbound links.

Performance Tracking and Reporting

Performance is monitored through Google Analytics 4, Google Search Console, Bing Webmaster Tools and third-party SEO software. Monthly reports highlight organic traffic, keyword rankings, Map Pack position, AI-answer visibility, backlinks and — most importantly — calls, WhatsApp clicks and bookings. Adjustments are made each month based on the data.

SECTION 6

Keyword clustering & page mapping

Keywords are grouped by the patient's intent, then mapped to one owning page. 'Priority' reflects commercial value and achievability for Lumos. Clusters marked **NEW PAGE** are gaps — demand the site does not currently serve.

Cluster	Representative keywords	Owning page	Intent	Priority
1. Clinic & location	dental clinic Sheikh Zayed Road; dentist near me Dubai; dental and aesthetic clinic Dubai; polyclinic Trade Centre; dentist DIFC	Home + /dentist-in-dubai/	Local / transactional	Very high
2. Cosmetic dentistry	veneers Dubai; veneers price Dubai; Hollywood smile Dubai; Hollywood smile cost; E-max veneers; composite veneers; smile makeover	/treatments/veneers-in-dubai/; /hollywood-smile-makeovers/	Commercial	Very high
3. Implants & restorative	dental implants Dubai; implant cost Dubai; All-on-4 Dubai; zygomatic implants; full mouth rehabilitation; crowns; dentures	/dental-implants-in-dubai/ + sub-pages	Commercial	Very high
4. Orthodontics	Invisalign Dubai; clear aligners Dubai; braces cost Dubai; adult orthodontics	/orthodontics/ + **NEW PAGE** Invisalign / clear aligners	Commercial	High
5. General & emergency dentistry	teeth cleaning Dubai; free dental check-up; root canal cost Dubai; tooth extraction; fillings; emergency dentist Dubai	Existing pages + **NEW PAGE** emergency dentist	Transactional	High
6. Teeth whitening	teeth whitening Dubai; Zoom whitening price; laser teeth whitening	/teeth-whitening-in-dubai/	Commercial	High
7. Injectables	Botox Dubai; anti-wrinkle injections price; lip fillers Dubai; jawline filler; liquid rhinoplasty; MD Codes; fat-dissolving injections	/anti-wrinkle-injectables-in-dubai/; /lip-fillers-in-dubai/ etc.	Commercial	Very high
8. Skin boosters & regenerative	Profhilo Dubai; polynucleotides Dubai; Rejuran; Jalupro; PDRN salmon DNA; exosomes; skin boosters	Existing treatment pages + hub	Commercial / research	High
9. Laser & advanced skin	laser hair removal Dubai; pico laser; Fotona; HydraFacial price Dubai; chemical peel; Cosmelan; acne scar treatment; melasma / pigmentation treatment	Laser & skin pages (consolidated)	Commercial	High
10. Hair restoration	PRP hair treatment Dubai; exosomes for hair loss; hair loss treatment for women; hair mesotherapy	/hair-loss-treatment-in-dubai/ hub	Commercial	Medium
11. Wellness & IV therapy	IV drip Dubai; glutathione drip; vitamin infusion; NAD+ drip; nutrition consultation	/iv-drips-vitamin-infusions-in-dubai/	Commercial	Medium
12. Intimate wellness	vaginal rejuvenation Dubai; vaginismus treatment; labial fillers; intimate lightening; P-shot; snoring laser (NightLase)	Consolidated /treatments/ pages	Commercial (discreet)	Medium

Supporting informational clusters (AEO & blog)

Question cluster	Example queries	Format
Cost & pricing	how much are veneers in Dubai; Hollywood smile price per tooth; Botox price Dubai	Price guide + FAQ
Suitability & safety	are veneers permanent; is Profhilo safe; who should not get fillers	Expert article + FAQ
Comparisons	veneers vs bonding; Invisalign vs braces; Profhilo vs polynucleotides; Botox vs fillers	Comparison table
Recovery & results	how long do lip fillers last; laser hair removal sessions needed; implant healing time	Step guide + FAQ
Arabic-language demand	Arabic searches for dental clinic, Hollywood smile, fillers and Botox in Dubai	Arabic pages (Phase 2)

SECTION 7

Answer Engine Optimisation (AEO)

AEO earns Lumos the 'answer' position — featured snippets, People Also Ask boxes, voice assistant responses and Google AI Overviews. The single largest barrier today is technical: 36 pages, including the main dental and aesthetic hubs, instruct Google not to show any snippet from them.

Quick win: removing the 'nosnippet' directive is a settings change in Rank Math that takes minutes and immediately makes these pages eligible for snippets and AI Overview citations again.

AEO techniques we will apply

Technique	Implementation on lumosclinics.com
Question-led headings	H2s phrased the way patients ask: 'How much do veneers cost in Dubai?', 'Does Botox hurt?'
Answer-first paragraphs	A direct 40–60 word answer immediately below each question, followed by detail.
Structured FAQs	5–8 FAQs per treatment page with FAQPage schema; questions sourced from Search Console, People Also Ask and front-desk enquiries.
Lists, steps & tables	The existing 'Step 1–5' treatment journey re-tagged as an ordered list with H3s; price and comparison tables in HTML (not images).
Price transparency	'From AED ___' ranges where DHA rules permit — the most frequently asked question type.
Voice & conversational search	Natural-language phrasing, local references (Sheikh Zayed Road, Trade Centre Metro) and opening-hours answers.
Snippet monitoring	Monthly tracking of owned featured snippets and People Also Ask placements.

Example — veneers page answer block

How much do veneers cost in Dubai?
At Lumos Dental & Aesthetic Clinic, porcelain veneers start from AED ___ per tooth and composite veneers from AED ___ per tooth. The final price depends on the number of teeth, the material and whether gum contouring is needed. Your dentist confirms a written quote after a consultation. *(Prices to be supplied by Lumos.)*

SECTION 8

Generative Engine Optimisation (GEO / AI search)

Patients increasingly ask ChatGPT, Gemini, Perplexity and Google AI Mode questions such as *'Which clinic on Sheikh Zayed Road is good for veneers?'*. These engines recommend businesses they can crawl, clearly identify, and see corroborated by other trusted sources. GEO makes Lumos that business.

GEO workstreams

Workstream	Actions	Status today
1. Crawl access	Allow-list GPTBot, OAI-SearchBot, ClaudeBot, PerplexityBot, Google-Extended and Bingbot at the CDN; keep robots.txt open to them.	GPTBot blocked (429)
2. Entity clarity	One consistent brand name, address and phone everywhere; MedicalClinic schema with geo-coordinates (25.20896, 55.27250); full sameAs list.	Inconsistent
3. Machine-readable summary	Rewrite llms.txt: who Lumos is, services by category, doctors, location, hours, booking links.	Present but weak
4. Citable content	Clear facts AI engines can quote: prices, session counts, recovery times, doctor credentials, devices used (Fotona, PicoSure, Zoom).	Partial
5. Third-party corroboration	Reviews on Google, Doctify and Okadoc; mentions in Dubai media and 'best clinic' lists; accurate Bing Places and Apple Business Connect listings.	Minimal
6. Freshness & authorship	Dated, medically reviewed content with named clinician authors.	Missing
7. AI visibility tracking	A fixed monthly panel of 30 patient prompts run across ChatGPT, Gemini, Perplexity and Google AI Overviews; we report mention rate, citation rate and competitors cited.	Not measured

Sample monitoring prompts

- Best dental clinic on Sheikh Zayed Road Dubai
- Where can I get a Hollywood smile in Dubai and how much does it cost?
- Recommended clinic for Profhilo or polynucleotides near DIFC
- Clinic in Dubai that does dentistry and aesthetics in one place
- Laser hair removal clinic near Trade Centre Metro

SECTION 9

Schema & structured data plan

Rank Math currently outputs generic Organization, WebSite, WebPage, Service and BreadcrumbList markup. We will replace this with a medical-entity graph that tells Google and AI engines exactly what Lumos is, where it is, who works there and what each treatment involves.

Schema type	Where	Key properties
MedicalClinic + Dentist	Site-wide (homepage, contact)	name, address, geo, telephone, openingHoursSpecification, medicalSpecialty, priceRange, hasMap, sameAs, logo, image
Physician	Each doctor profile	name, medicalSpecialty, qualifications, memberOf, worksFor, image, DHA licence identifier
MedicalProcedure / Service	Each treatment page	name, procedureType, bodyLocation, howPerformed, preparation, followup, offers (price range), provider
MedicalWebPage	Treatment & blog pages	about, lastReviewed, reviewedBy (Physician), audience
FAQPage	Treatment pages with FAQs	Question / acceptedAnswer pairs matching visible on-page FAQs
BreadcrumbList	All pages (exists)	Keep; align with new category hierarchy
VideoObject / ImageObject	Treatment videos, galleries	name, description, thumbnailUrl, uploadDate
Article / BlogPosting	Blog	author (Physician), datePublished, dateModified, publisher

Note: Google does not display star-rating rich results for reviews a business publishes about itself, so we will not mark up on-site testimonials as AggregateRating. Review strength is built on Google instead.

Sample — site-wide MedicalClinic markup (abridged)

```
{
  "@context": "https://schema.org",
  "@type": ["MedicalClinic", "Dentist"],
  "@id": "https://lumosclinics.com/#clinic",
  "name": "Lumos Dental & Aesthetic Clinic",
  "legalName": "Lumos Polyclinic L.L.C.",
  "url": "https://lumosclinics.com/",
  "telephone": "+971 4 352 4140",
  "email": "info@lumosclinics.com",
  "address": {
    "@type": "PostalAddress",
    "streetAddress": "Aspin Commercial Tower, Sheikh Zayed Road",
    "addressLocality": "Dubai",
    "addressCountry": "AE"
  },
  "geo": { "@type": "GeoCoordinates", "latitude": 25.20896, "longitude": 55.27250 },
  "medicalSpecialty": ["Dentistry", "Dermatology"],
  "openingHoursSpecification": [ "... to be confirmed by Lumos ..." ],
  "sameAs": [
    "https://www.instagram.com/lumosclinic.ae/",
    "https://www.facebook.com/p/Lumos-Dental-Aesthetic-Clinic-61573771378003/",
    "<Google Business Profile URL>", "<Doctify profile URL>"
  ]
}
```

SECTION 10

Sitemap & site architecture

The site's XML sitemap (generated by Rank Math) lists 127 URLs across a page sitemap and a treatments sitemap. It includes pages that should not be indexed, omits the About page, and exposes duplicate treatment URLs. We will restructure both the XML sitemap and the visible navigation around a clear category hierarchy.

XML sitemap changes

Action	URLs affected
Remove & noindex	/my-account/, /customer-dashboard/, /latepoint/, /latepoint-booking/, /survey-page/, /sitemap/ (HTML sitemap)
Redirect & remove (duplicates)	18 root-level treatment pages duplicated under /treatments/, plus overlapping pages listed in Section 4.2
Fix slug & redirect	Three /treatments/https-lumosclinics-com-.../ URLs; /viginismus/; /dental-treatments-dubai-2/
Add	/about/, new doctor profiles, new Contact page, category hubs, blog post sitemap, video sitemap
Consolidate legal pages	/terms/ and /terms-and-conditions/ into one URL
Resubmit	Google Search Console and Bing Webmaster Tools after each structural release

Proposed site architecture

Level 1	Level 2 (category hubs)	Level 3 (examples)
Home	—	—
Dentistry	Cosmetic · Implants & Restorative · Orthodontics · General & Emergency	Veneers · Hollywood Smile · Whitening · Dental Implants · All-on-4 · Invisalign · Root Canal · Cleaning
Aesthetics	Injectables · Skin Boosters & Regenerative · Body	Botox · Lip Fillers · Jawline · Profhilo · Polynucleotides · Rejuran · Fat Dissolving
Dermatology & Laser	Medical Dermatology · Laser · Facials & Peels	Acne & Scars · Pigmentation · Pico Laser · Fotona · Laser Hair Removal · HydraFacial · Chemical Peels
Hair	Hair Restoration	PRP · Exosomes for Hair · Mesotherapy
Wellness	IV Therapy · Intimate Wellness · Men's Health	IV Drips · Vaginal Rejuvenation · P-Shot · NightLase
Our Doctors	One profile per clinician	Dr. Ammar Zaki · Dr. Saleh Ibrahim · Dr. Rahul Patel · Dr. Shima · Dr. Lama Husein
Prices & Offers	Price guides by category	Shine Rewards · seasonal offers
Patient Guides (Blog)	Dental · Aesthetic · Skin · Wellness	Cost guides · comparisons · aftercare
About · Contact · Book	—	Location, parking, Metro directions, hours, map, WhatsApp

URL convention: /dentistry/veneers-dubai/, /aesthetics/lip-fillers-dubai/ — short, readable and grouped by category. Where changing URLs would put existing rankings at risk, we keep the current URL and achieve the hierarchy through breadcrumbs and internal links.

SECTION 11

Website design & UI/UX changes

Today's main navigation offers only 'Home' and 'All Services'. A patient looking for a specific treatment, a doctor or a price has to scroll or search. The changes below are prioritised by their effect on bookings.

Priority	Change	Rationale
Critical	Sticky mobile action bar: Call · WhatsApp · Book	Keeps conversion one tap away on every screen.
Critical	Replace the two autoplay hero videos (5.9 MB) with an optimised still image and a tap-to-play video	Single largest cause of the 10.9s mobile load.
High	Mega-menu navigation by category (Section 10) plus 'Our Doctors', 'Prices' and 'Book'	Faster path to the right treatment; stronger internal linking.
High	Trust strip above the fold: DHA licence, Google rating and review count, years in practice, technologies	Healthcare patients decide on trust before price.
High	Doctor profile pages with photo, qualifications, languages and treatments performed	E-E-A-T and patient confidence.
High	Treatment page template: one H1, answer-first intro, price range, steps, FAQs, doctor, before & after, CTA	One template fix improves ~90 pages.
High	Booking flow: shorten the LatePoint journey; pre-select treatment from the page the patient came from	Fewer steps mean more completed bookings.
Medium	Compliant before-and-after galleries with consent and disclaimers	Strongest persuasion asset in aesthetics.
Medium	Dedicated Contact page: map, parking, Metro directions, hours, WhatsApp	/contact/ currently returns 404.
Medium	Replace phone-number headings with buttons; fix contrast and link labels	Accessibility (83/100) and clean structure.
Medium	Arabic language version for top treatments (Phase 2)	Serves Arabic-speaking patients and Arabic search demand.

Page-speed benchmarks for your developer

Metric (mobile)	Today	Target
Lighthouse performance score	28	70 or higher
Largest Contentful Paint	10.9 s	2.5 s or less
Total Blocking Time	8,820 ms	300 ms or less
Server response (TTFB)	2.0 s	0.8 s or less
Page weight (homepage)	12.7 MB	2.5 MB or less
DOM elements	4,806	1,500 or fewer
Cumulative Layout Shift	0.00	Keep below 0.1

SECTION 12

Plan of action — Google Business Profile

The Google Business Profile is the most influential factor for appearing in the Map Pack and on Google Maps. Our plan covers a full audit, a build-out of every available field, and a weekly operating rhythm.

Profile audit & build-out

- **NAP consistency**: one public name, address (including unit number in Aspin Commercial Tower) and phone across Google, Apple Business Connect, Bing Places, Doctify, Okadoc, Salonist and directories.
- **Categories**: primary 'Dental clinic'; secondary categories such as 'Cosmetic dentist', 'Dental implants provider', 'Orthodontist', 'Skin care clinic', 'Dermatologist' and 'Laser hair removal service' — only where the service is genuinely provided.
- **Services**: every treatment listed individually with a description and, where permitted, a 'from' price — from general dentistry to specific fillers and skin boosters.
- **Hours**: regular hours plus special hours for Ramadan, Eid and public holidays.
- **Links**: booking link and WhatsApp chat enabled; website link tagged with UTM codes so GBP traffic is measured separately.
- **Attributes**: accessibility, payment methods, languages spoken, appointment requirements.
- **Description**: 750-character description leading with location and specialties.

Ongoing optimisation

- **Weekly posts**: clinic updates, treatment spotlights, compliant before-and-after highlights and monthly offers.
- **Photo programme**: fresh, authentic photos and short videos every week — clinic interior, team, equipment, building entrance and parking — tagged and named with location-relevant descriptions.
- **Review programme**: post-appointment WhatsApp and QR-code review requests; target a steady weekly flow rather than bursts; every review answered within 48 hours, with care taken never to confirm patient details in replies.
- **Location-based keywords**: services, posts and replies referencing Sheikh Zayed Road, Trade Centre, DIFC and Downtown naturally.
- **Spam & competitor monitoring**: watch for incorrect edits to the listing and report policy-violating competitor listings.
- **Map Pack rank tracking**: grid-based tracking of key searches across the surrounding districts, reported monthly.

> **Gap we will close:** outside Google, Lumos has almost no review footprint — the Salonist listing shows no reviews and Lumos does not appear on Doctify. Building verified reviews on these platforms feeds both local rankings and AI recommendations.

SECTION 13

Plan of action — Google Ads & GMB Ads

Optional service. Google Ads management is not part of the monthly retainer and involves no ad spend unless Lumos chooses to proceed. It is set out here so the clinic can add it later.

A Google Ads tag is already installed. Paid search delivers patient enquiries immediately while organic rankings build over 4 to 6 months, and its search-term data feeds directly into our SEO keyword strategy.

Campaign	Focus	Notes
Local Search & Maps Ads	Ads inside Google Maps and the Local Map Pack	Driven by the optimised GBP; location extensions.
High-intent dental	Veneers price Dubai, Hollywood smile Dubai, dental implants cost Dubai, emergency dentist	Separate ad groups per treatment, each landing on its own page.
High-intent aesthetics	Botox Dubai, lip fillers Dubai, Profhilo Dubai, laser hair removal Dubai	Offer-led ads within DHA rules.
Brand protection	'Lumos clinic' and misspellings	Low cost; prevents competitors capturing brand searches.
Remarketing	Visitors who viewed treatment or price pages but did not book	Display and YouTube; consultation-led messaging.

Conversion tracking

- Working with your developer, every call, WhatsApp click, form submission and LatePoint booking is tracked in GA4 and Google Ads.
- Call tracking for website and ad calls, so each enquiry is credited to the right campaign.
- Offline conversion import (attended consultations) so bidding optimises for real patients, not just clicks.
- Budget recommendations are finalised after Month 1 keyword and CPC research, and presented for your approval.

Policy note: Google restricts advertising for some sexual-health and intimate-wellness treatments. These services are best grown through organic search and GBP rather than paid ads.

SECTION 14

Healthcare compliance & E-E-A-T

Healthcare is a 'Your Money or Your Life' category: Google and AI engines hold medical content to a higher standard, and UAE regulators govern healthcare advertising. These items are often missed in SEO plans; we build them in from day one.

- **DHA advertising rules**: all promotional content, offers and before-and-after imagery prepared to align with Dubai Health Authority requirements; claims such as 'Best in-class' reviewed and replaced with verifiable statements.
- **Clinician credentials**: every doctor's qualifications, specialty and DHA licence displayed and linked from treatments.
- **Medical review**: each treatment page and article carries a named medical reviewer and a review date.
- **Patient privacy**: review responses, testimonials and case studies handled in line with UAE data protection law and the clinic's Patient Data & Consent Policy; consent captured for all patient imagery.
- **Balanced information**: risks, contraindications and recovery described alongside benefits — a ranking signal and a regulatory expectation.

SECTION 15

Measurement, KPIs & reporting

Month 1 establishes the baseline from Google Search Console, GA4, Google Business Profile Insights and the AI-visibility prompt panel. Targets below are what we will work towards and report against monthly.

KPI	Baseline (Oct 2026)	Target by Month 6
Pages blocked by 'nosnippet'	36	0 indexable pages
Duplicate / overlapping treatment URLs	18 pairs + 6 overlaps	0
Pages with exactly one H1	70 of 127	100%
Pages with meta description	98 of 127	100%
Mobile Lighthouse performance / LCP	28 / 10.9 s	70+ / 2.5 s or less
Medical schema coverage (clinic, doctors, treatments)	0%	100%
Published patient-guide articles	0	20+
AI-assistant mention rate (30-prompt panel)	Measured Month 1	Month-on-month growth
Organic clicks & non-brand keywords in top 10	Measured Month 1	Month-on-month growth
Google reviews (count & velocity)	Measured Month 1	Steady weekly growth; 48-hour response
Calls, WhatsApp clicks & bookings from organic + GBP	Tracking set up Month 1	Reported monthly by channel

Monthly report contents

- Executive one-page summary: enquiries, bookings and cost per enquiry by channel.
- Rankings by keyword cluster, Map Pack grid, featured snippets and AI-answer visibility.
- Work completed, work planned, and decisions we need from Lumos.

SECTION 16

Six-month roadmap

Phase	Timing	Key deliverables
1. Foundation & quick wins	Weeks 1–4	Remove 'nosnippet'; noindex utility pages; allow-list AI crawlers; GA4 / Ads conversion tracking; Search Console & Bing setup; GBP audit and build-out; keyword baseline; caching and hero-video fix.
2. Consolidation & on-page	Month 2	Redirect duplicate and malformed URLs; treatment template fix (H1s, structure); titles and meta descriptions for all pages; MedicalClinic and Physician schema; new sitemap.
3. Content & AEO	Months 3–4	FAQs on top 30 treatments; price guides; doctor profiles; first 8–10 patient-guide articles; mega-menu and mobile CTA bar; directory citations (Doctify, Okadoc, Apple, Bing).
4. Authority & GEO	Months 5–6	Digital PR and backlinks; review programme at full pace; llms.txt and entity work; comparison pages; Arabic content plan; AI-visibility optimisation from prompt-panel results.
Ongoing	Monthly	Four articles, weekly GBP posts and photos, review responses, rank and AI tracking, monthly report and strategy call.

SECTION 17

Why this approach works

- **Collaboration, not competition:** we work *with* your existing developer, providing the strategy and specifications that turn the site into a revenue generator.
- **Data-driven decisions:** every recommendation in this proposal is backed by measured evidence from your live website.
- **Built for how patients search now:** one programme covering Google, the Map Pack and AI assistants.
- **Measurable growth:** a direct line from our work to calls, WhatsApp enquiries and booked consultations.
- Proven track record of delivering high ROI for service businesses.
- Expertise in tailored organic and paid media strategies.
- Commitment to transparency and measurable results.

Moving forward

We are happy to discuss your needs and refine this proposal so that it aligns with your budget and objectives. Phase 1 quick wins can begin within one week of signing.

Pricing Structure — Lumos Dental & Aesthetic Clinic

Starting retainer: 500 AED

Service	Scope	Price	Total
UI/UX Consultation	1 website	Free	Free
Monthly SEO, AEO, GEO & GMB Profile Optimisation	1 website	1,000 AED / month	1,000 AED / month

Payment terms

- Billed monthly.
- Minimum 6-month commitment recommended.
- Upfront retainer paid on signing of the contract.
- No advertising spend is included or required under this retainer.

Optional add-ons (if needed later)

- Additional landing pages and Arabic-language pages.
- Email and WhatsApp marketing campaigns.
- Content writing packages beyond four articles per month.
- Google Ads and Meta (Instagram / Facebook) ads management (Section 13), quoted separately if required.

We are confident that we can build a successful business together.

Sincerely,

Salman Usman
AiS LABZ Business Consultants
